

Array  
of  
ice cream

```
let flavors =  
  ['chocolate', 'strawberry', 'vanilla',  
   'Pistachio'];  
flavors[2]; // 'vanilla'  
flavors[4] = 'Rocky Road';  
flavors[4]  
  = 'Butter Pecan';
```

# JavaScript Basics

## Arrays [ and Loops ]

### For Loop

```
for (let i = 0; i < flavors.length; i++) {  
  console.log(flavors[i]);  
}
```

prints out each flavor  
after each iteration!

### While-Loop

```
let i = 0;  
while (i < flavors.length) {  
  console.log(flavors[i]);  
  i++;  
}
```

The loop will stop  
when the condition  
is met!
