JavaScript Basics
Making Decisions

Booleans
`true` `false`

```
let myStatement = true
let anotherStatement = false
```

If statements
else / if

```
if (Status === 200) {
    message = 'OK';
} else {
    message = 'Error!';
}
```
true → message = 'OK';
false → message = 'Error!';
Condition

Ternary
```
const message =
    (status === 200) ? 'OK' : 'Error!';
```

Comparing values

>	Greater than	<	Less than
>=	Greater than or equal to	<=	Less than or equal to
==	equal values	!=	not equal values
===	equal values + data types	!==	not equal values + data types

```
'42' == 42    true
'42' === 42   false
```
string v. number

Logical Operators

`&&` logical AND
`||` logical OR
`!` logical NOT

Red AND fruit   red OR fruit   red, not fruit
